EXPERIENCE

Software Engineer | Team/TechLead
DashBouquet
09/2018 - Present

- Created Custom Linux distribution kits with automatic installation
- Designed and implemented pipeline to collect and visualize 1M+ records per day
- Optimized and reduced device network traffic by 30-100 times through data aggregation and compression
- Trained NN to perform highly accurate realtime age and gender estimation (98.5% −gender and 61% − age)
- Implemented people-tracking algorithm for computer vision data
- Created 30+ small-to-medium applications for interactive screens, 3 complicated dashboards using React.
- Developed several applications with 3D-environment and physics using THREE.js and WebGL
- Oversaw teams from 2 to 8 engineers
- Interviewed more than 50 candidates for engineering positions in the company

Web developer
Paprikash Studio
07/2017 - 09/2018

- Made adjustments and feature-implementations for online-shops
- Created 10+ landing pages
- Developed complex front-end solutions for sites of various themes and functionality

Storekeeper
PromAgroPack-2007
07/2015 - 07/2017

- Developed internal web-based software for production processes automation

EDUCATION

Civil Engineering
Brest State Technical University
2009

SUMMARY

I am a highly motivated versatile person able to quickly investigate, evaluate, and adjust to new challenging contexts and lead a multicultural team towards effective and mutually beneficial solutions. I am an avid learner with a focus on details which makes absorption of advanced technical manuals and mastering of cutting-edge innovations my natural cup of tea. More than 7 years of experience in three successful companies where I engineered and curated through designing, developing, coding, deployment and software architecture stages more than 10 projects.

SKILLS

Javascript / Typescript	Expert
